

Operations awarded with Golden Supportive Fellowship by SUNFO

Sri Lanka United Nations Friendship Organization (SUNFO) recently recognized the Director Operations of J Lanka Technologies (Pvt) Ltd - Gunaseeli Jayasoma with a 'Golden Supportive Fellowship' title at the SUNFO International Women's Day Commemoration held at the Auditorium of the National Museum of Sri Lanka. The title and the award was presented to her by SUNFO in recognition of her available Services rendered and esteemed contribution made towards the well-being of mankind together with SUNFO.

"SUNFO", a non-political, non-racial and non-sectarian organization working for the well-being, peace and harmony of mankind upholding the noble principles of the United Nations under the patronage of the Hon. Speaker of the Parliament of Sri Lanka and with the blessings of the United Nations.

Upon the receiving of the award Director Operations of J Lanka Technologies (Pvt) Ltd - Gunaseeli Jayasoma said that being Sri Lanka's pioneer in next generation most advanced Solar Power solutions provider, her organisation J Lanka Technologies is delighted on recognition of their company's efforts to make many homes in the country being powered by Solar and Renewable Energy. According to her, J Lanka officials, J Lanka Technologies had been influential in setting a trend in the domestic Solar Technology market showcasing how to "Reclaim Renewable Energy" in Sri Lanka since inception. She said that J Lanka Technologies is diversifying in an attempt to have a one-stop-shop for solutions that provide next generation energy technologies to the nation and to exploring the possibilities of exporting their technology to the region.

J Lanka is currently the owners of highest

number of solar installations around the country as the leading next generation solar service provider and since the inception to date J Lanka's total installed solar electricity capacity has now exceeded over 7 MW.

J Lanka's vision towards a greener country has reduced over 3,233 tons of CO2 (Carbon Dioxide) emissions which is equivalent to saving 10,800 trees on planet or over 2,400 million liters of Hydrocarbon Fuels burned or 2,754 tons worth of coal used for power generation. J Lanka Technologies, the number one solar energy supplier to the National Grid in Sri Lanka with 24,000 kWh per day power generation and these systems are empowered with over 24,000 Trina Solar modules and 24,000 SolarEdge power optimizers and about 1,500 SolarEdge inverters saving 8,850 kg of greenhouse gas emission per day.
